About Aftermath Islands Metaverse Limited – www.aftermathislands.com

Aftermath Islands Metaverse Limited is a Barbados corporation which is 50% owned and is controlled by Oasis Digital Studios Limited, a wholly owned subsidiary of Liquid Avatar Technologies Inc.

Aftermath Islands as first described in the initial whitepaper published in 2017 and then subsequently updated, was based on the premise of a water-world with islands that represented destinations in a global virtual game. Since then, the Aftermath Islands metaverse has evolved and now represents exciting themed based islands, communities, and estates where players can experience a wide range of adventures and opportunities.

In Aftermath Islands' virtual world, users can buy, develop, trade, and sell Virtual Land (VL), property and assets, like buildings, crafted items, transport, and other items all through NFTs, a non-fungible token that represents the ownership of virtual and other assets. Each plot or parcel of VL is unique and owners get to choose what content they want to publish on their VL. This can range from simple scenery and structures to an interactive game, store, warehouse, dwelling, facility, or destination. Users can purchase VL as well as all other goods and services in Aftermath Islands with CREDITS, the current code name for in-game currency, fiat and other authorized currencies, coins, and tokens.

Aftermath Islands is a shared virtual world, much like the Metaverse described by author Ernest Cline in his science-fiction novels *Ready Player One* and *Ready Player Two*. Expected to launch mid-2022, Aftermath Islands will allow users to connect and interact with each other, create content, craft, participate in activities and quests and play games. Aftermath Islands will have a virtual economy where users can engage in a myriad of in-world economic transactions as well as monetize the content, items, quests, and applications they build.
